

# NARFIL 500

INFORMATIVE  
DATA SHEET

MADE IN ITALY

## HEAVY DUTY

### COMPOSITION

BACKING: biaxially oriented polypropylene film reinforced with longitudinal glass fibres

ADHESIVE: synthetic rubber / hydrocarbonic resins

CORE: recycled paper and paperboard

### SUITABLE FOR

Heavy packaging; binding things; palletizing

### AVAILABLE COLOURS

Transparent

The high performance hot melt adhesive and the glass fiber reinforced backing make this product the ideal choice for all packaging needs, also the heaviest.

ADHESION  
> 8 N/cm

BREAKING LOAD  
> 220 N/cm

HEAVY WEIGHT  
PACKAGING

ORGANIC SOLVENTS FREE

It is good practice to use the product within 12 months from purchase date (6 months if jumbo roll). The rolls must be kept in their original packing. Keep the product out of the light and protect from direct heat sources. The tape must be kept in a dry place, at humidity level below 65%, preferably at a temperature between 15° C and 25° C. If the storage temperature is different, restore the tape back to above level before using it. The values in the informative data sheets are the average results of tests made on our standard production and are not legally binding. The aesthetic and technical features may be subject to some changes caused by ageing, even though the quality level of the product is maintained. Nar shall not be liable for direct damages or for any consequence arising from the misuse of the product. We suggest the verification of the product suitability to the specific condition of use. Additional indications are available in the last edition of the booklet "Recommendation regarding choice, storing and use of pressure sensitive tapes" published by Federazione Gomma Plastica.
